IEEE BigData 2016

Symposium on Data Analytics for Advanced Manufacturing

Dec.5-8, 2016 Washington D.C., USA

This symposium intends to provide a platform for researchers and industry practitioners from manufacturing, information science, and data science disciplines to share their data mining and big-data-analytics-related research results, and practical design or development experiences in the manufacturing industry.

Bosch invites participants to apply for one of three **\$2,000 travel stipends** to attend the conference and present research from their work in this competition. Anyone interested in being considered for a stipend should submit a paper (up to [10 page IEEE 2-column](#) format through the [online submission portal](#)) no later than **September 20th, 2016**. In addition, they should also fill out this [application form](#). Stipends will be awarded on the basis of application merit, unrelated to performance in the Bosch challenge.
